

1. INTRODUCTION

- 1.1 The purpose of this report is to update Members of the Committee on the provision of passenger shelters throughout Greater Manchester, and provide an update in respect of associated issues
- 1.2 Currently 4,375 shelters are provided at 12,048 bus stops throughout Greater Manchester. It is considered that through delivery of the shelter programme, shelters have now been provided at the vast majority of popular stops across the conurbation and emphasis is now placed on maintaining current levels. GMITA/PTE's business and performance target requires that 36% of stops are provided with shelters. By the end of February 2010 this target will have been exceeded, with 36.31% of stops having shelters.

2. SHELTER PROVISION

- 2.1 As of the 18th February 2010, 4,375 shelters are provided at 12,048 bus stops throughout Greater Manchester. Of these, 3579 under the contract with J C Decaux, whilst the remaining 796 are GMPTE owned, non-advertisement shelters, comprising 459 on Quality Bus Corridors and 337 throughout the general network.
- 2.2 A breakdown of the shelters installed per district is as follows:

	<u>Bus Stops/ District</u>	<u>PTE</u>	<u>JCD</u>
Bolton	1375	48	318
Bury	884	39	241
Manchester	2007	186	858
Oldham	1078	66	286
Rochdale	1041	95	269
Salford	980	22	389
Stockport	1149	89	344
Tameside	1117	82	266
Trafford	888	79	283
Wigan	<u>1529</u>	<u>90</u>	<u>325</u>
Totals	<u>12048</u>	<u>796</u>	<u>3579</u>

- 2.3 Although completion of GMITA's/PTE's shelter programme was achieved in March 2009, the Executive's Route Equipment function are continuing to receive and process requests for additional shelters. All requests are logged on the shelter register and to date there are 42 active requests. A summary, per district, is as detailed over:

District	Total number of Non-QBC shelter requests in progress	Total Number of QBC (or other similar initiatives) shelter requests in progress	Sites passed by Committee/Consultations complete/Shelters on order
Bolton	3	2	1
Bury	2	0	0
Manchester	10	1	0
Oldham	1	0	0
Rochdale	1	2	1
Salford	2	0	1
Stockport	2	3	1
Tameside	2	0	0
Trafford	5	0	0
Wigan	4	2	0
Totals	32	10	4

- 2.4 Limited budget provisions have been included within GMITA/PTE's 2010/11 Minor Works Capital Programme, to address further requests received in the coming financial year. With regard to the proposed arrangements for the future procurement of shelters, a paper is included under a separate agenda item to this committee.

3. MAINTENANCE LIABILITIES

- 3.1 To deliver an efficient and effective maintenance service to PTE owned shelters, contracts are in place with Seddons Construction for responding for the reactive repairs and Tudor Cleaning for fortnightly cleaning of shelters.
- 3.2 In respect to the maintenance work undertaken by Seddons, repair response times of shelter damage are monitored to ensure an effective service. Despite the adverse weather condition experienced during December and January, over these two months 91% of calls were completed within the required timescales/category, against a target of 85%.
- 3.3 In addition to measuring service levels in respect of reactive repairs, levels of shelter damage are also monitored. If a shelter is encountering repeated damage this is addressed by replacing the glazing with either reinforced plastic panels or clear polycarbonate sheets.
- 3.4 For the financial year to date 245 reports of damage have been recorded, incurring a maintenance liability of £32,583.00. A breakdown of the expenditure per district is as follows: -

<u>District</u>	<u>Expenditure</u> £
Bolton	4,370
Bury	2,253
Manchester	10,560
Oldham	1,519
Rochdale	2,310
Salford	847
Stockport	4,453
Tameside	1,434
Trafford	2,232
Wigan	2,605

4.0 PERMANENT ELECTRICAL SUPPLY TO BUS SHELTERS

- 4.1 As members are aware, it is the aspiration of the PTE to provide permanent electrical supply where possible to create a safe and secure waiting environment for passengers.
- 4.2 Over the past five years, the number of shelters provided has increased significantly. Of the 796 PTE owned shelters installed, 457 are connected to a permanent electrical supply, with a further six connections currently on order with United Utilities. Of the remaining 339 shelters which are currently unconnected, 103 of these sites cannot be connected to permanent supply due to logistical reasons.
- 4.3 As was agreed by members of this Committee on 13th November 2009, the capital releases for 2010/11, are predominately to be used to fund electrical connections, and reduce the amount allocated for increasing the number of shelters. Although it is acknowledged that the 2010/11 capital programme is subject to approval by ITA Policy Committee, it is considered that by adopting this approach will enable a significant progress to be made in clearing the number of outstanding connections. Following current practices, any connections up to the value of £1000 will be progressed. However, any connections in excess of £1000 will be reviewed and consideration given to utilising solar technology.
- 4.4 Full details of unconnected shelters, in priority order, are detailed in Appendix 'A' of this report.
- 4.5 With regards to use of solar technology over the past two years 50 shelters across the conurbation have had solar panels retrospectively fitted. During these two years, the systems installed have demonstrated reliability both in terms of maintenance and levels of illumination provided. Subsequently, for those shelters where a permanent supply cannot be achieved due to either logistical or financial reasons, the use of solar technology is to be

considered, with the aim to retrospectively fit solar systems at a further 20 sites, during 2010/11.

4.6 In respect of the shelters provided under the agreement with JC Decaux, the current position is as detailed below:

- Total number of shelters connected 3221
- 52 shelters awaiting connection by United Utilities.
- 77 shelters awaiting quotations from United Utilities.
- 229 shelters cannot be connected for logistical reasons.

In an effort to clear the backlog with, agreement has been reached between J C Decaux and United Utilities that a minimum of six connections per month will be undertaken.

4.7 A further report is to be submitted to June's meeting of the Committee, confirming progress made.

5. RECOMMENDATIONS

5.1 A full set of recommendations appears at the front of this report.

Michael Renshaw
Interim Bus and Rail Director
